Our Lady of the Lake Pediatric Residency Program

We believe in the power of children.

Children make up a quarter of Louisiana’s population, a new generation who will change the health of our people, and the future of our state. As a community-based residency, we are committed to training the next generation of amazing pediatricians who create a healthier tomorrow. We invite you to join us.

Welcome

Thank you for your interest in the Our Lady of the Lake Pediatric Residency Program. Our Lady of the Lake Children’s Health is a vibrant and growing statewide health system, deeply rooted in our mission to serve all of God’s children, especially those most in need.

Our Lady of the Lake Children’s Hospital in Baton Rouge, Louisiana is the central hub for pediatric care in our system and provides care for children across the Gulf South. We work as a family and value our residents, who receive individualized mentorship, competitive compensation and other generous benefits including housing and cell phone stipends, provider wellness care, and much more.

We value inter-professional teamwork, service to our community, and a commitment to providing the highest quality care. The team thrives in our learning environment – complete with diverse and individualized curricula, simulation and procedural skills, and the development of scholarly projects and quality improvement activities.

As a resident, you will care for children with complex care needs and diverse pathology with guidance, encouragement, and support from our amazing team of subspecialists and pediatricians. Residents who complete our program grow throughout their three-year journey as they prepare for fellowship or joining a practice as a well-rounded, well-prepared pediatrician.

As a faith-based organization, we are constantly seeking opportunities to better serve our learners, faculty, and patients. Our mission extends beyond medicine; we strive to be health partners to the communities where we live, serve, and know our neighbors personally. Community engagement is a key element of our educational and advocacy outreach programs. Our residents graduate with the skills and drive necessary to be an effective advocate for their patients, families, and community to create a healthier tomorrow for today’s children.

It is our commitment to provide you with the tools you need for a successful career. We encourage you to learn more about our program and connect with us for more information. Our residents and program team have many virtual opportunities just for you!

We look forward to meeting and partnering with you to advance healthcare in Louisiana and beyond.

Leading the Future

Thank you for your interest in our Pediatric Residency Program at Our Lady of the Lake Children’s Hospital. Our program is part of a vibrant and growing health system in Louisiana, and deeply rooted in our mission to serve those most in need. Our Lady of the Lake Children’s Hospital in Baton Rouge, Louisiana serves children across the Gulf South. Our familial atmosphere is woven into all that we do - provider wellness, individualized mentorship, quality care, and more. We create an exciting learning environment through diverse didactic curricula, simulation and procedural skills, and the development of scholarly projects and quality improvement activities.

Our engagement with the communities in which we live and serve is at the heart of our clinical learning environment and form the foundation of our educational and advocacy outreach programs.

From Our Chiefs

We’re excited to be part of an organization that remains focused on training the next generation of pediatricians with the knowledge and skills to solve the most difficult health problems while expanding healthcare services for our children in the years to come. Our training is supported by a healthcare ministry that has persevered to provide a single standard of care across Louisiana and Mississippi and continually pushes to raise that standard.

As chiefs, we are looking to welcome residents who have excelled as medical students, are driven to contribute their unique strengths to our team, and who are dedicated to caring for children in an environment that prioritizes family-centered care practices.

“Our leaders, physicians and residents work together as a team to help children,”

– Melissa Roy, MD, Program Co-Director

From Our Residents – Past and Present

“I love the one-on-one and personal teaching session with attending physicians. It’s a medium-sized pediatric residency program—big enough to help you grow, yet small enough to know ‘you’.”
– Whitney Allen, MD, Class of 2023

“I feel confident that I can take care of children in an inpatient or outpatient setting. The program has taught me how to advocate for children outside of the clinic or hospital.”
– John Ghassan, DO, Class of 2021

“Love the hospital! Love the people! Pediatricians are known for being nice, fun, down-to-earth people. On interview day I met a bunch of these true pediatricians and knew I needed to come to Our Lady of the Lake to work with them. The new colorful hospital just reinforces this feeling for me. Plus, there’s at least one of every specialty here, so there’s no shortage of rotations to try.”
– Marcus Stripling, MD, Class of 2023

“This residency has provided a balance of inpatient and primary care opportunities. I feel confident treating minor ailments as well as recognizing critically ill patients.”
– Megan Nuss, MD, Class of 2021

“This was a truly well-rounded pediatric residency program. We had excellent faculty who love teaching, a team of residents who really do end up being your second family, and a variety of pathology seen within Baton Rouge. Overall, I felt like I received great training that prepared me for my future. Three years flies by faster than you think, and I am so proud to have been able to train in this program!”
– Melissa Holland, DO, Class of 2020

“The faculty has always been very devoted to teaching. I received great training in pediatrics that prepared me for fellowship. I decided to join my former mentors from residency as a pulmonary attending. I wanted to be part of the opening of the free-standing children’s hospital, and contribute as much as I could to the building blocks that will continue to make this institution one of the finest that I have worked.”
– Andres Carrion, MD, Class of 2013
From Our Program Faculty

“There are few occupations where you are a teacher and a student. What I appreciate most about the landscape of allergy is that I can improve a child’s day-to-day life all while creating meaningful relationships with my families and have a great time doing it.”
— Sandhya Mani, MD, Allergy/Immunology

“Working with residents ensures that I am intellectually stimulated. This makes me a better doctor and enhances the quality of care I provide to my patients.”
— Adaora Uzodi, MD, Pediatric Infectious Disease

“Two minds are always better than one. The residents are always teaching me new guidelines or making sure to use evidence-based medicine to make sure our practices are accurate and up to date.”
— Courtney Campbell, MD, Associate Program Director, PAC Attending

“Working with residents means we always have many sets of eyes on each patient and we always have someone available. We also teach and practice evidence-based medicine, which ensures the best medical care for our amazing patients.”
— Cecilia Duchamp, MD, Pediatric Hospital Medicine, Class of 2018

SPECIALTIES AT OUR LADY OF THE LAKE CHILDREN’S HOSPITAL
At Our Lady of the Lake Children’s Health, we believe that access to primary care and subspecialty services is critical to improving children’s health. We offer comprehensive ongoing care in more than 30 specialties with over 180 providers.

Orthopedics
Adolescent Medicine
Allergy & Immunology
Anesthesiology
Cancer & Blood Disorders
Cardiology
Cleft & Craniofacial
Critical Care
Developmental Medicine
Ear, Nose & Throat
Endocrinology
Emergency Medicine
Gastroenterology
Genetics
Hospital Medicine
Infectious Disease
Neonatal Intensive Care
Nephrology
Neurology
Neurosurgery
Ophthalmology
Orthopedics
Psychiatry
Pulmonology
Radiology
Sleep Medicine
Surgery

Our faculty’s passion for caring for children runs deep. They thrive on providing superb training to tomorrow physicians so that children receive the best possible care.
A Day in the Life:
A Hospital Designed for Children and their Families

Our Lady of the Lake Children’s Hospital in Baton Rouge is a beacon of hope for countless families, anchoring a collaborative and coordinated statewide children’s health network with greater access to more than 180 providers specifically trained to care for children. We work with children and parents every day across Louisiana to address every type of health issue facing the state’s more than 1 million children, ensuring the best possible outcomes and laying the foundation for a healthier state for generations to come.

Our new hospital is not only a state-of-the-art facility, but an independent academic learning center designed with children in mind. The Children’s Hospital was built to help children and their families traveling through their journey of healing in life’s most tender moments.

During residency, a majority your time will be spent at Our Lady of the Lake Children’s Hospital, which serves as the hub of our statewide clinical network. Our Baton Rouge campus has the region’s only 24/7 pediatric emergency room and Level II trauma department, as well an entire floor dedicated to critical care for the pediatric and neonatal patient. Your learning environment extends beyond the walls of our hospital through your work with amazing pediatricians at our Pediatric Academic Clinic, Health Centers in Schools, and our mobile health unit known as “the Blue Bus”.

You will also experience newborn care and neonatal intensive care at Woman’s Hospital in Baton Rouge, one of the largest specialized hospitals in the country serving women’s birthing needs. In addition to our services in Baton Rouge, our statewide clinical network, Our Lady of the Lake Children’s Health, unites pediatricians and pediatric specialists across Louisiana to provide advanced and specialized care in communities where our regional healthcare ministries are well established:

**Acadiana:** Our Lady of Lourdes, Woman’s & Children’s Hospital

**Baton Rouge:** Our Lady of the Lake Children’s Hospital

**Monroe:** St. Francis Medical Center, North Shore, Our Lady of the Angels Hospital
Our Program

**Advocacy**
We believe residents must learn to be advocates for their patients during residency to continue to serve as effective pediatricians. Every intern participates in a focused Community Medicine rotation that provides an understanding of the problems and challenges in mobilizing community resources aimed at delivering safe, effective, efficient, and timely care for their pediatric patients.

During this rotation, interns learn about the challenges and disparities facing our local community, evaluate state policies and legislative processes as related to child health, and engage in efforts to advocate for change. All residents choose an individualized second month of Advocacy and/or Community Medicine which allows them to further explore and promote their areas of interest.

Each resident completes an individualized project or advocacy hours focused on an individual, community, state, or national child health issue that they feel committed to as pediatricians.

**Community-based Program**
As part of an independent academic medical center, we are also a community-based program meaning we are not directly tied to a medical school (though we host dozens of students from Louisiana and around the country each year). This provides a great opportunity for our residents to have more participation in the region they serve and more ownership of their clinical care. Residents donate time to causes in the community, share their expertise with local schools, and advocate for their patients in multiple avenues (legislative, media, regulatory agencies). We strive to serve the needs of the communities we serve. Our Lady of the Lake Children’s Hospital assesses community health needs and develops the appropriate plans to address these needs to improve and sustain the health of the children in our community. Our organization works with the Louisiana AAP, healthcare providers, community organizations, and other leaders to develop strategies to address the community needs. Our Lady of the Lake partnered with The Mayor’s Healthy City Initiative and other community hospitals to publish a Joint Community Health Needs Assessment.

Our Lady of the Lake Children’s Hospital Baton Rouge Children’s Health Project provides medical and mental health services to underserved children and families in the Baton Rouge area. Residents can work on the “Blue Bus” to travel around the parish to schools providing more access to healthcare to children across our community. Additionally, Our Lady of the Lake Children’s Health Centers in Schools and community-based teams are the collaboration of education, public health, and school health professionals to improve the development and well-being of our children. Our school-based health centers provide comprehensive health services and wellness education to students in grades K-12 in East Baton Rouge School System. Our residents can serve the children of our community by providing care on both the blue buses and the health centers in schools.

**Curriculum**
In addition to the core curriculum, our residents can choose from a long list of subspecialty rotations and electives in a timeframe that aligns with their personal learning needs and career goals. We meet with our residents to help guide their decisions as we create their individualized learning experience. Whether it is choosing more time attending deliveries at Woman’s Hospital (one of the largest delivery hospitals in the country), completing an advocacy project during a global health elective, working at a rural FQHC clinic, taking a deeper dive into medical education, or doing a maternity/paternity elective - our program boasts many unique elective opportunities and prides itself on providing what each and every resident needs.

**Diversity and Inclusion**
Our Pediatric Residency Program and the FMOLHS care ministry recognize the importance of diversity – both in the workforce and in meeting the needs of diverse patients. We are committed to encouraging diversity and ending healthcare disparities. Our resident and faculty are invited to join the Our Lady of the Lake Diversity & Inclusion Council which works to ensure alignment with the organization’s mission and operations and establishing a dedicated focus on diversity and inclusion. Our residents and faculty are also encouraged to participate in a facilitated educational dialogue around the understanding of institutional and systemic racism hosted by Dialogue on Race Louisiana.

Our Pediatric Residency Program Diversity and Inclusion Committee is dedicated to increasing education, awareness, and improvement in diversity, inclusion, healthcare disparities, social determinants of health and health equity. Our resident and faculty curriculum includes lecture style didactics, online modules, journal clubs, and small group exercises. We financially support participation in career development opportunities for underrepresented individuals offered through national organizations such as APA, APPD, and SNMA. Additionally, we are fostering longitudinal partnerships with key community organizations, churches, schools, businesses that serve diverse groups in our community for outreach and educational purposes. Our residents and faculty support these organizations and our community during dedicated time for resident retreats, Advocacy and Community Medicine rotations, and through advocacy projects and community service.
• Education
We know that to be prepared to take on fellowship or your first job, there is a lot of information to learn during your three years of residency! We have a weekly protected academic half-day focused on board specific topics in addition to morning reports three times a week.

Interprofessional Grand Rounds occur twice monthly and Morbidity and Mortality Conference occurs monthly as well. Additionally, we have twice monthly “Lagniappe” lectures focused on topics equally important to prepare you to be a well-rounded, competent, empathetic physician; topics range from understanding implicit bias and cultural humility to career development and personal finance.

Board preparation begins in the intern year and we provide every resident the PREP question bank and the MedStudy Curriculum package including questions, flashcards, books and a weeklong board review course during your 3rd year of residency (paid for by the program). We incorporate MedStudy readings with monthly quizzes, chief monthly board reviews, PGY-3 led board review every Thursday, and quarterly practice exams in addition to the yearly in-training exam to help you monitor your progress. Board Prep coaches help you to identify your areas of strength and weakness and help you create and stick to your study plans.

• Pediatric Academic Clinic (PAC)
This serves as our continuity clinic site for our categorical residents. Residents build up their own continuity panel of patients, participate in the weekly Yale Pediatric Curriculum, and engage in simulation exercises. Residents have multiple outpatient research opportunities at the PAC including national collaboration with QI projects and vaccine trials. The PAC also provides walk-in appointments, language interpreter services, an on-site laboratory and extended hour clinics (evenings and weekends are not staffed by residents). Additionally, the PAC has recently been awarded Reach Out and Read Site certification and is the recipient of a Charlie’s Kids Book Donation Program.

• Quality Improvement and Patient Safety
We offer an innovative curriculum focused on providing our residents the required tools to help change the system of care and cross the “quality chasm.” All residents complete the Institute for Healthcare Improvement Basic Certificate in Quality and Safety, which provides an excellent foundation in QI. Residents participate in a didactic and experiential curriculum that provides the framework for working in multidisciplinary teams to improve care. Residents attend Safety Rounds and complete at least one quality improvement project during their residency. Our faculty and residents participate in projects sponsored by the national AAP Value in Inpatient Pediatrics (VIP) Network and APA Continuity Research (CORNET) Network. Residents can opt for a Quality Improvement and Patient Safety elective to further their understanding and experience in this field.

• Primary Care
Our Primary Care Program is the only one of its kind in the state of Louisiana and one of only a few Primary Care Programs in the US. Our unique program is a separate branch from our categorical residency program with more focus on providing enhanced primary care experience. This is achieved through increased clinic time in continuity clinics with a community pediatrician, primary care centered journal clubs quarterly (all residents invited), and focused general pediatric morning reports.

This is a separate match classification on NRMP and interested applicants can rank both the Primary Care Program and the Categorical Program. Three residents in each class are designated Primary Care Program residents.

Program Codes:
Categorical Pediatrics: 1421320C0
Primary Care Pediatrics: 1421320M0

• Global Health
Our Global Health Director oversees quarterly global health educational sessions. International Health Electives (IHE) are available during the 2nd and 3rd years of residency. Our residents have worked in India, Vietnam, Uganda, Costa Rica, Honduras, and Cameroon. Individual mentoring for those residents doing IHEs in site selection, preparation, financial planning, and debriefing. The residency program continues your benefits and salary during your IHE and scholarships are available for those residents who include scholarly projects with their IHE.
• Simulation
Simulated scenarios and procedures are incorporated into the curriculum to give you even more opportunities to practice your critical thinking and hands-on skills. Simulations take place in our dedicated simulation space in the PICU and in-situ mock codes occur in other areas of the hospital twice per month. Dedicated program procedure days occur twice a year and simulation exercises are incorporated into rotation experiences including PICU, NICU, Cardiology and the Pediatric Academic Clinic.

• Wellness and Teambuilding
Our program understands “physician wellness” is unique to each individual resident. Our program takes a multi-faceted approach with a year-long wellness curriculum, weekly wellness emails, and a range of wellness activities including protected time to schedule appointments. Residents also have access to a campus assistance program. Team building exercises begin during intern orientation and are intertwined with resident activities throughout the academic year, all paid for by the Program. A fall overnight retreat is held at an off-campus retreat center and focuses on teamwork, leadership, and communication. Spring class retreats focus on advocacy and service in the morning and wellness activities chosen by the class for the afternoon and evening.

• Research
Our residents learn how to critically evaluate, collect, and interpret data, how to compose abstracts and many other basic research principles. With the help of our dedicated Pediatric Research Director and faculty, all residents complete a minimum of one scholarly project. Our residents participate in scholarly activities ranging from Advocacy and Global Health to Clinical Trials, Quality Improvement and Medical Education.

Research Scholars Track is an optional track that spans one academic year and is designed to further expose upper-level residents to human research. Scholars experience the full research process, from protocol development and IRB approval through data analysis and manuscript preparation.

All scholars choose a clinical mentor and are assigned a research advisor to guide him or her through the Scholars Track.

Our institution was selected by ACGME as one of eight teaching hospitals across the country to participate in a 4-year initiative to create new models of integration between healthcare delivery systems and graduate medical education. Our residents have presented their research at local, regional, national, and international conferences and have been published in several medical journals. The residents receive financial support to be able to travel to conferences to present their research.

• Perks
We support our residents financially via competitive salary, housing allowance, phone stipend, moving reimbursement, yearly educational allowance, and the cost of USMLE/COMLEX Step 3. The program also supplies each resident with scrubs and coats, free parking, free membership in specific professional organizations and both PREP and MedStudy Board Preparation Curriculum. Residents have protected time for weekly academic half-day, retreats, and MedStudy course. Residents receive complimentary meals in the physician’s lounge and an employee discount in hospital café.

The Franciscan Missionaries of Our Lady have been providing compassionate pediatric care in Louisiana for nearly 75 years. These important milestones have paved the way for the new Our Lady of the Lake Children’s Hospital.

1945

Our Lady of the Lake Regional Medical Center moves to Essen Lane. Pediatric ward has 10 beds.

1948

Baton Rouge’s first specialized pediatric ward opens at Our Lady of the Lake, separating children from adults.

1950

Affiliation agreement with St. Jude Children’s Research Hospital begins.

1978

Our Lady of the Lake Children’s Hospital is officially named.

1980

Pediatric ER becomes only 24/7, 365-day exclusive pediatric ER in Baton Rouge.

1990

Pediatric hospitalist service is established.

1995

First pediatric heart catheterization lab is developed.

1998

Pediatric Emergency Department is created.

2000

Pediatric Residency Program begins, and 10-bed Pediatric Progressive Care unit is established. Dedicated pediatric Operating Room and pediatric ICU physicians move in-house to provide 24/7, 365 coverage.

2002

Pediatric ER becomes only 24/7, 365-day exclusive pediatric ER in Baton Rouge.

2003

Our Lady of the Lake Children’s Hospital is officially named.

2004

Transport Team is established. Children’s Health Fund is established, “blue busses” begin outreach work.

2005

Our Lady of the Lake Children’s Hospital is officially named.

2006

Pediatric Residency Program begins, and 10-bed Pediatric Progressive Care unit is established. Dedicated pediatric Operating Room and pediatric ICU physicians move in-house to provide 24/7, 365 coverage.

2007

Pediatric Residency Program begins, and 10-bed Pediatric Progressive Care unit is established. Dedicated pediatric Operating Room and pediatric ICU physicians move in-house to provide 24/7, 365 coverage.

2008

Pediatric Residency Program begins, and 10-bed Pediatric Progressive Care unit is established. Dedicated pediatric Operating Room and pediatric ICU physicians move in-house to provide 24/7, 365 coverage.

2009

Pediatric Residency Program begins, and 10-bed Pediatric Progressive Care unit is established. Dedicated pediatric Operating Room and pediatric ICU physicians move in-house to provide 24/7, 365 coverage.

2010

Franciscan Missionaries of Our Lady Health System approves building the freestanding children’s hospital. Redesigned and expanded pediatric ER opens. “Amazing” campaign is launched.

2011

Let’s Build Amazing Capital Campaign kicks off.

2012

Groundbreaking for children’s hospital, construction begins.

2014

Health Centers in Schools program becomes a subsidiary.

2015

Health Centers in Schools program becomes a subsidiary.

2016

Health Centers in Schools program becomes a subsidiary.

October 5, 2019

The first and only hospital in Louisiana designed and built from the ground up to serve children opens.
Guiding Principles

We intend to create a place for children and their families...

For safe, state-of-the-art healthcare that promotes the Spirit of Healing in Louisiana.

Where the best care is provided to all.

That is iconic to the community.

Where love inspires children’s laughter and awakens their spirits.

That exudes confidence, excitement, and amazement.

With a peaceful, spiritual connection to nature.

That expresses extreme humility, hope, and gratitude to the Lord.

A Call to Serve

The Franciscan Missionaries of Our Lady Health System is a leading health care innovator in Louisiana and Mississippi. We bring together outstanding clinicians, the most advanced technology and leading research to ensure that our patients receive the highest quality and safest care possible. This commitment is grounded in a history that is more than 105 years old and is reflected today by our strategic vision of transforming healthcare through superior performance and excellent patient care.

Mission

Inspired by the vision of St. Francis of Assisi and the tradition of the Roman Catholic Church, we extend the healing ministry of Jesus Christ to God’s people, especially those most in need.

We call forth all who serve in the healthcare ministry, to share their gifts and talents to create a spirit of healing - reverence and love for all of life, with joyfulness of spirit, and with humility and justice for all those entrusted to our care.

We are, with God’s help, a healing and spiritual presence for each other and for the communities we are privileged to serve.

Core Values

- Service
  The privilege of reaching out to meet the needs of others.

- Reverence and Love for All of Life
  Acknowledging that all of life is a gift from God.

- Joyfulness of Spirit
  An awareness of being blessed by God in all things.

- Humility
  Being authentic in serving as an instrument of God.

- Justice
  Striving for equity and fairness in all relationships with special concern for those most in need.

We invite you to learn more about our amazing residents and faculty. We are always adding more information to our website, so please check back often for updates at www.ololchildrens.org/pediatricresidency
